* If you are applying for multiple facilities, you must call 1-888-339-PTRK(7875)

Why do we need this information?

EPA needs background information on your facility to evaluate your application.

What do you need to do?

- ♦ Provide background information on your facility.
- ♦ Identify your environmental requirements.

Section A

Tell us about your facility.

1 What do you do or make at your facility?

Unbleached Linerboard

2 List the North American Industrial Classification System (NAICS) codes that you use to classify business at your facility.

NAICS
322130 _____

3 Does your company meet the Small Business Administration definition of a small business for your sector?

☐ Yes ☒ No

4 How many employees (full-time equivalents) currently work at your facility? If you checked "Yes" in question 3 and have fewer than 50 employees at your facility, then you are considered a "small facility" by the Performance Track Program.

- ☐ Fewer than 50
- ☐ 50-99
- ☒ 100-499
- ☐ 500-1,000
- ☐ More than 1,000

5 Complete the Environmental Requirements Checklist on pages 32-38 of the instructions and enclose it with your application.

Expiration Date:

-
- 6 Optional: Is there anything else you would like to tell us about your facility? Do you participate in other voluntary programs at the local, tribal, State, or Federal level?

The Vicksburg Mill is strongly committed to excellence in all areas of production. Since 1999 one-third to nearly one-half of our capital spending budget has been allocated to projects to reduce emissions, improve energy usage, and implement projects to ensure environmental excellence.

Why do we need this information?

Facilities need to have an operating Environmental Management System (EMS) that meets certain requirements.

What do you need to do?

- ♦ Confirm that your EMS meets the Performance Track requirements.
- ♦ Tell us if you have completed a self-assessment or have had a third-party assessment of your EMS.

Section B

Tell us about your EMS.

Read the EMS requirements on page 9-12 of instructions.
Tell us if your EMS meets these requirements for:

Why do we need this information?

Facilities need to show that they are committed to improving their environmental performance. This means that you can describe past achievements and will make future commitments.

What do you need to do?

Refer to the Environmental Performance Table in the instructions to answer questions 1 and 2.

Section C

Tell us about your past achievements and future commitments.

Part 1 You must report past achievements for at least two environmental aspects, and you must choose these aspects from the Environmental Performance Table on pages 29-31 of the instructions. Please quantify each of your aspects using the units listed for that aspect in the Environmental PTrack Information Hotline at 1-888-339-PTRK.

Note to small facilities: If you are a small facility, you must report past achievements for only one environmental aspect.

First achievement

1 What aspect have you selected from the Table on page 29-31?	Emissions of NOx	
2 What units are you using to quantify this aspect? (See Table, page 29-31.)	tons	
	PAST	CURRENT
3 List the past annual quantity of the aspect (from two years ago) and the current annual quantity of the aspect (from the most recent year for which you have data).	701	314
4 What are the years for which you are reporting these quantities?	2000	2003 YTD
5 Estimate your past normalizing factor (Page 18 of the Instructions will help you calculate this.)	1.47	1.0
6 What is your normalizing factor based on (e.g., production, employment)?	Million Btu of Steam Produced in the Power Boiler	

0032

OMB No. 2010-

06/30/03

Expiration Date:

<p>7 You reported an improvement in the quantity of the aspect in Question 3. How did you achieve this improvement?</p>	<p>NOx emissions are the result of incomplete combustion. To improve combustion efficiency in the power boiler, over fire air and low NOx burners were installed in April 2003.</p>
---	---

Second achievement

1 What aspect have you selected from the Table on page 29-31?	BOD Discharges to Water	
2 What units are you using to quantify this aspect? (See Table, page 29-31.)	tons	
	PAST	CURRENT
3 List the past annual quantity of the aspect (from two years ago) and the current annual quantity of the aspect (from the most recent year for which you have data).	90.2	49.2
4 What are the years for which you are reporting these quantities?	2000	2002
5 Estimate your past normalizing factor (Page 18 of the Instructions will help you calculate this.)	0.86	1.0
6 What is your normalizing factor based on (e.g., production, employment)?	tons of bone dry pulp produced	
7 You reported an improvement in the quantity of the aspect in Question 3. How did you achieve this improvement?	By replacing the existing turpentine decanter and converting the existing decanter into a turpentine storage tank, turpentine is more effectively recovered, thereby reducing the BOD of water going to the waste-water treatment ponds by nearly 50%.	

Part 2 You must make future commitments for at least four environmental aspects, and you must choose these aspects from the Environmental Performance Table on pages 29-31 of the Instructions. The aspects you select for your future commitments should be related to the objectives and targets in your EMS. Where possible, they also should be identified as having a significant environmental impact in your EMS. No more than two of your aspects can be from the same environmental category. If you're not sure how your objectives and targets fit into our aspects or whether your aspects are significant, call the PTrack Information Hotline at 1-888-339-PTRK.

Once you have chosen your four environmental aspects, then fill in all the necessary information for these aspects in the tables on pages 7-10 of this form. Please quantify each of your aspects using the units listed for that aspect in the Environmental Performance Table. Each table that you must fill in corresponds to one of the environmental aspects you have chosen.

We will assume that your performance commitments are based on a constant production or employment level. If you would like to base your commitment on changing production or employment, please fill out optional questions 6a and 6b.

Expiration Date:

Note to small facilities: If you are a small facility, you must report future commitments for only two environmental aspects.

Section C, continued

Expiration Date:

First commitment

1	What aspect have you selected from the Table on pages 29-31?	Emissions of Particulate Matter	
2	What units are you using to quantify this aspect?	tons	
3a	Is this aspect considered significant in your EMS?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
3b	If no, please explain why you believe this aspect should be included as a performance commitment.		
		CURRENT	FUTURE
4	List the current annual quantity of the aspect and the annual quantity you are committing to achieve by the end of the third year of your participation in Performance Track.	242	195
5	What are the years for which you are reporting these quantities?	2002	2006
6a	(Optional) What is your future normalizing factor. (Page 21 of the Instructions will help you calculate this.)	1.0	
6b	(Optional) What is your normalizing factor based on (e.g., production, employment)?		
7	You committed to an improvement in the quantity of this aspect in Question 4. How do you plan to achieve this improvement?	This improvement will be the result of several capital projects: the installation of baffles within the precipitator ductwork, ductwork repairs and improvements, increased current to the preipitator via the use of "juice cans", and the installation of a distributed control system to improve recovery boiler operation.	
8a	Are you subject to Federal, State, tribal, or local regulatory requirements for this aspect?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
8b	If yes, please list those requirements, including the quantitative limits and compliance deadlines that apply to you. Explain how your commitment exceeds requirements.	Mact II requires that recovery boiler emissions of particulate matter be reduced to less than 271 tons per year by March 13, 2005. Although our emissions already meet this requirement, further steps will be taken to improve both the performance of the precipitator and the operation of the recovery boiler, to minimize production of particulates while maximizing their capture.

Second commitment

1	What aspect have you selected from the Table on pages 29-31?	Total Energy Use	
2	What units are you using to quantify this aspect?	million Btu	
3a	Is this aspect considered significant in your EMS?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
3b	If no, please explain why you believe this aspect should be included as a performance commitment.		
		CURRENT	FUTURE
4	List the current annual quantity of the aspect and the annual quantity you are committing to achieve by the end of the third year of your participation in Performance Track.	2,486,064	2,315,713
5	What are the years for which you are reporting these quantities?	2002	2006
6a	(Optional) What is your future normalizing factor. (Page 21 of the Instructions will help you calculate this.)	1.0	
6b	(Optional) What is your normalizing factor based on (e.g., production, employment)?		
7	You committed to an improvement in the quantity of this aspect in Question 4. How do you plan to achieve this improvement?	By replacing the 64 sootblowers installed in 1983 with 70 more efficient sootblowers, a savings of 170351 million Btu per year will be realized. This realization will result from reduced steam usage.	
8a	Are you subject to Federal, State, tribal, or local regulatory requirements for this aspect?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
8b	If yes, please list those requirements, including the quantitative limits and compliance deadlines that apply to you. Explain how your commitment exceeds requirements.		

Section C, continued

Expiration Date:

Third commitment

1	What aspect have you selected from the Table on pages 29-31?	Recycled/Reused Materials Use	
2	What units are you using to quantify this aspect?	tons	
3a	Is this aspect considered significant in your EMS?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
3b	If no, please explain why you believe this aspect should be included as a performance commitment.		
		CURRENT	FUTURE
4	List the current annual quantity of the aspect and the annual quantity you are committing to achieve by the end of the third year of your participation in Performance Track.	36556 tons	76650 tons
5	What are the years for which you are reporting these quantities?	2002	2006
6a	(Optional) What is your future normalizing factor. (Page 21 of the Instructions will help you calculate this.)	1.0	
6b	(Optional) What is your normalizing factor based on (e.g., production, employment)?		
7	You committed to an improvement in the quantity of this aspect in Question 4. How do you plan to achieve this improvement?	Corrugated paper from various sources outside of the Vicksburg Mill that would otherwise be thrown away (landfilled) is recovered in our fiber reclaim system and turned into pulp. By increasing the capacity of the existing fiber reclaim facility at the Vicksburg Mill, the percentage of recycled paper integrated within a standard sheet will be increased thereby reducing the demand for fresh pulp.	
8a	Are you subject to Federal, State, tribal, or local regulatory requirements for this aspect?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
8b	If yes, please list those requirements, including the quantitative limits and compliance deadlines that apply to you. Explain how your commitment exceeds requirements.		

Fourth commitment

1 What aspect have you selected from the Table on pages 29-31?	Total Solid Waste	
2 What units are you using to quantify this aspect?	tons	
3a Is this aspect considered significant in your EMS?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
3b If no, please explain why you believe this aspect should be included as a performance commitment.		
	CURRENT	FUTURE
4 List the current annual quantity of the aspect and the annual quantity you are committing to achieve by the end of the third year of your participation in Performance Track.	0*	0
5 What are the years for which you are reporting these quantities?	2002	2006
6a (Optional) What is your future normalizing factor. (Page 21 of the Instructions will help you calculate this.)	1.0	
6b (Optional) What is your normalizing factor based on (e.g., production, employment)?		
7 You committed to an improvement in the quantity of this aspect in Question 4. How do you plan to achieve this improvement?	*Wood ash, produced in the power boiler at a rate of approximately 28,500 tons per year, is currently being used to build levees around the waste-water treatment ponds. However, the levee project will be completed by the end of 2003. To avoid landfilling wood ash, it will be combined with spent lime and sold to local farmers for landspreading applications.	
8a Are you subject to Federal, State, tribal, or local regulatory requirements for this aspect?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
8b If yes, please list those requirements, including the quantitative limits and compliance deadlines that apply to you. Explain how your commitment exceeds requirements.	For use as an agricultural product, both exemption from regulation by the Mississippi DEQ and state registration of wood ash as an agricultural product will be required.	

Why do we need this information?

Facilities need to demonstrate their commitment to public outreach and performance reporting. You should have appropriate mechanisms in place to identify community concerns, to communicate with the public, and to provide information on your environmental performance.

What do you need to do?

- ♦ Describe your approach to public outreach.
- ♦ List three references who are familiar with your facility.

Section D

Tell us about your public outreach and reporting.

1 How do you identify and respond to community concerns?

(1) The Community Advisory Council comprised of leaders from the Vicksburg Mill, including the mill manager, and local business leaders, citizens, etc, meets monthly to share mill news and listen to community feedback.

(2) Periodically, special meetings are held with the business leaders to share ideas, concerns, plans, etc.

2 How do you inform community members of important matters that affect them?

(1) Important news is published in the Vicksburg Post.

(2) Special meetings are held with local community and business leaders.

(3) Communications professionals are on staff to prepare news releases and answer requests for information.

3 How will you make the Performance Track Annual Performance Report available to the public?

On behalf of International Paper's Vicksburg Mill
[my facility],

I certify that

I have read and agree to the terms and conditions for Application and Participation in the National Environmental Performance Track, as specified in the *National Environmental Performance Track Program Guide* and in the *Application Instructions*;

- I have personally examined and am familiar with the information contained in this Application, including the Environmental Requirements Checklist. The information contained in this Application is, to the best of my knowledge and based on reasonable inquiry, true, accurate, and complete, and I have no reason to believe the facility would not meet all program requirements;
- My facility has an environmental management system (EMS), as defined in the Performance Track EMS requirements, including systems to maintain compliance with all applicable Federal, State, tribal, and local environmental requirements in place at the facility, and the EMS will be maintained for the duration of the facility's participation in the program;
- My facility has conducted an objective assessment of its compliance with all Federal, State, tribal, and local environmental requirements, and the facility has corrected all identified instances of potential or actual noncompliance;
- Based on the foregoing compliance assessment and subsequent corrective actions (if any were necessary), my facility is, to the best of my knowledge and based on reasonable inquiry, currently in compliance with applicable Federal, State, tribal, and local environmental requirements.

I agree that EPA's decision whether to accept participants into or remove them from the National Environmental Performance Track is wholly discretionary, and I waive any right that may exist under any law to challenge EPA's acceptance or removal decision.

I am the senior facility manager and fully authorized to execute this statement on behalf of the corporation or other legal entity whose facility is applying to this program.

Paperwork Reduction Act Notice

The public reporting and recordkeeping burden for this collection of information is estimated to average 40 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the Director, Collection Strategies Division, U.S. Environmental Protection Agency (2822), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460.
